

NOTICE

TO ALL NEW PATIENTS WHO PARTICIPATE IN “PROMOTIONAL DENTAL PACKAGE” AT MASTERPIECE SMILES

This is a “promotional dental package” in which our dental hygienists will be polishing teeth with ADA approved fluoridated dental pumice and removing plaque and soft debris from the exposed tooth surfaces, taking check up x-rays and clinically evaluating patients’ oral health. Dr. Beeler will also do a brief clinical examination and make future treatment recommendations.

BENEFITS

- ✓ This \$75 promotional cleaning, exam, and x-rays has a **\$150 value**
- ✓ BWX-rays for cavity detection and evaluate bone loss on back teeth
- ✓ Brighter Smile - removal of soft deposits and stains
- ✓ Clinical therapeutic benefit (less plaque = better gum health)
- ✓ Especially benefits age groups 5-10 (just learning to brush properly)
- ✓ Especially benefits age groups 11-18 (self esteem/ teenage concerns)
- ✓ Recommendations about any future treatment
- ✓ Establish new Doctor/patient relationships?

WHAT WE WILL BE EVALUATING

- Presence or absence of decay
- Gum health/ dry mouth/ bad breath
- Airway space (enlarged tonsils)
- Oral habits (ie. Teeth grinding, thumb sucking, fingernail biting)
- Tongue thrust / fever blisters / mouth ulcers
- Normal versus abnormal tooth eruption of “baby” teeth
- Normal versus abnormal baby teeth loss
- Normal versus abnormal “permanent” teeth eruption
- Normal versus abnormal tooth position (ie. Crooked or crowded)
- Spaced teeth, missing teeth
- Normal versus abnormal teeth wearing (night time teeth grinding)
- Cross bite, underbite, overbite
- Orthodontic candidate (preventive or interceptive orthodontics?)
- Cosmetic concerns (discolored, worn, broken, missing teeth)
- Implant screening (for missing teeth)
- TMJ screening (headaches, jaw popping or clicking)
- Old, worn-out, discolored fillings or crowns (new material recommendations)
- Invisalign candidate?
- Sleep apnea? (snore guard)

NOTICE

The Following Should be Primarily of Concern for Adult Patients

1. We are not removing any plaque or calculus (tarter) from below the gum tissue.
2. We will not be “scaling” or removing any hard calcified deposits from the tooth surfaces above the gum tissue.
3. All surface stains may not be removed.(ie. adults with tobacco, coffee, or tea stain)
4. We will not be doing a complete clinical periodontal evaluation or X-ray evaluation for the diagnosis of periodontal disease (gum disease).
5. We will not be “probing pockets” to measure bone loss and better evaluate gum health.
6. All future treatment recommendations related to gum health are based only on visual clinical examination, amount and presence of plaque and/or calculus, color and texture of gum tissue, any bleeding that we see before, during, or after polishing and flossing teeth, and any exudate (pus) that may be observed.

I HAVE READ AND UNDERSTAND THAT THIS “PROMOTIONAL DENTAL PACKAGE” IS LIMITED IN IT’S SCOPE, AND I HAVE BEEN ADVISED THAT MASTERPIECE SMILES RECOMMENDS TO ALL PATIENTS TO HAVE A MORE COMPLETE EVALUATION THAT INCLUDES COMPLETE MOUTH X-RAYS, PERIODONTAL PROBING, INTRAORAL AND EXTRAORAL PHOTOGRAPHS, A MORE THOROUGH CLINICAL EXAMINATION, AND A MORE DETAILED MEDICAL AND DENTAL HISTORY.
